

Desktop Wallpaper

Sporting Dynamite desktop wallpapers have been created for you to use on your PC. All the wallpapers have been constructed to 1024 x 768 resolution and therefore work best on this format.

To use one of our wallpapers right click the image you want to use and select "Set as Background" from the displayed menu, this will automatically adjust your desktop wallpaper to your chosen image.

If you like the new image with the fire and globe background instead of fireworks, let me know and I will see if I can create one for you as well.
